Good afternoon Chip, Wes mentioned you would be in contact. I have double checked and verified with our Dare County Communications administrator, we will not need or be utilizing the proposed site/antenna for our communications system. I thank you for your time..

David M. Kole

Subject: AT&T Tower at Civic Association

Fire Chief Bob Harvey & Police Chief David Kole,

I received your contact information from Wes Haskett. AT&T is submitting a zoning application (tomorrow) to construct a flag pole designed communications tower on property owned by the Southern Shores Civic Association. Part of the application process states:

“Documentation from the town's police and fire service providers regarding the number and type of emergency communication antennas which are necessary for the wireless telecommunications site to support such communications along with a certification from a professional engineer registered in the state stating that the wireless telecommunications site is designed to support the attachment of the necessary emergency communication antennas.”

Do either of your departments have a need or desire to add antennas to this proposed site? The drawings I will submit tomorrow, as part of the application, will provide certification from a professional engineer that the site will be designed to support emergency communication antennas. Please let me know if your department has a need with this tower and if you have any additional questions regarding this proposed location. Thank you for your assistance.

I concur with Chief Kole; however, I would not want to rule out any possible future need.

Bob
